

*The Foundation for
Community Inspiration*

64% of illness worldwide is caused by malnutrition.

This can come from poor water sanitation and hygiene. This contributes significantly to people dying in developing nations, participating from illnesses like cholera, diarrhoea, dysentery, malaria, and HIV. In particular many children under 5 tend to die from such related illnesses.

You can help stop these terrible illnesses now by donating

***Only £25 provides water to
a family of four for life***
